### California State University - Fullerton

August 2017 - January 2021

BACHELOR OF SCIENCE (BS) IN COMPUTER SCIENCE

- Dean's List x4
- Computer Science GPA: 3.6

## Technical Skills

TypeScript · JavaScript · Python · C++ · SQL · HTML · CSS · Node.js · Express.js · React.js · Next.js · Styled Components · Git / GitHub · REST · MongoDB · MySQL · PostgreSQL · Redis · Firebase · CLI

## Projects

### Liftona

*REACT.JS, NODE.JS, EXPRESS,JS, MONGODB, REDIS, STYLED COMPONENTS*

- Liftona is a web application that allows users to find and share workouts.
- Users can also follow other users and like their favorite workouts.
- All user input is validated rigorously before being sent to the server.
- Designed with a mobile-first approach using styled components and Flexbox as the main layout model.
- The backend for this project is still in development.

### Next Shop

*NEXT.JS, NODE.JS, MONGODB, STRIPE, SEMANTIC UI*

- Next Shop is an E-commerce site that allows users to view products, purchase products, and view their past orders. Root users are allowed to add or delete products.
- Next Shop implements server side rendering on a few pages to help improve user experience.
- Any page that does not require the most recent data will be cached by a CDN, allowing any subsequent requests to be served much faster.

### Tech Stories

*REACT.JS, FIREBASE*

- Users can search for stories, navigate through their search history, sort their search results, and most importantly, save their favorite stories.
- The stories listed on Tech Stories are provided by the Hacker News API.
- User authentication was provided by Firebase.

## Work History

### Ondas de Vida Network

2017-Present
